PARATECH

For more than 60 years, Paratech has been combining innovative design with cutting edge technology to provide the highest quality and most user-friendly tools available for rescue and beyond. From the world's most advanced collapse support solutions to some of the world's strongest forcible entry tools, Paratech makes technical rescue operations simpler, safer and more productive.

Our product lines are comprised of Rescue Support Systems, MAXIFORCE[®] Air Lifting Bags, The MULTIFORCE[®] Air Lifting Bag, Powered Impact Tools, Forcible Entry Tools, Rescue Air Cushions, and the ultimate collection of essential Paratech products...the SMT[™]... Special Mission Tender equipped specifically for either urban search and rescue or trench rescue, both are loaded with all of the necessary Paratech tools needed for technical rescue.

Paratech products are extensively used by fire departments worldwide including, but not limited to: all major U.S. cities, Copenhagen, Tokyo, London, Lyon, Madrid, Singapore and Istanbul. In addition, they have been selected by disaster agencies in the United States, Denmark, Japan, United Kingdom and Turkey as the standard for their rescue teams and technical rescue caches.

PARATECH®

Training & Tactics Courses

Paratech is a firm believer that Instruction in Rescue operations should be delivered by companies specialized in doing just that. We have received requests from customers around the world to provide instruction specific to Paratech products – The Paratech Training and Tactics program delivers this in two ways: the Paratech online Workshops and through our comprehensive Training and Tactics program where we have partnered with some of the best Instruction Companies around the world, use QR code for quotes and further informations.

Training Highlights

Vehicle & Machinery

Stabilizing and lifting light vehicles using air bags and StrutDrivers.

Building Collapse

Solid Sole, Flying, Split Sole and Corner Rakers. Window and door shores. Internal shoring and sloped floor shore.

Lifting & Moving

Using Paratech Monopod, Bipod and Tripods to lift and move objects using ropes and come-alongs.

The curriculum can also be customized to the department preferences: Trench Rescue, Structure Collapse, Confined Space, Ag Rescue and Vehicle Machinery Tech.

Lifting & Moving

Single, double and daisy chain lifts with Maxiforce Air Lifting Bags. Rescue Air Cushions and MultiForce Air Lifting Bags lifts.

Heavy Vehicle Stabilization and Lifting

Stabilizing and lifting heavy vehicles using air bags and HydraFusion struts.

Technical Rescue Response Unit

Paratech Technical Rescue Response Units - (TRRU)

The Paratech TRRU is a low maintenance and cost effective solution for fire departments and rescue teams.

A neat and organized mobile container for all your Paratech Technical Rescue Equipment.

Always Ready to deploy.

All the features of a Rescue Truck without the cost of indoor storage, maintenance and upkeep.

COMPACT TRRU

Technical Rescue Response Unit

Compact TRRU

The Compact TRRU is fully capable of initiating an array of US&R and vehicle rescues. It is small enough to maneuver through narrow streets, but big enough to respond to a vast array of rescues. The Compact TRRU is self-contained, can be remote positioned and is ready to roll at any time. This versatile trailer consists of a comprehensive set of Paratech equipment in one compact, mobile package. Includes an Absolute Flying Raker, Remote Placement MULTIFORCE Bag Kit, Man and Machine Kit, Air Control Case, Pakhammer Kit, PRT Kit and much much more.

The Paratech Rescue Support System

The Paratech Rescue Support System is truly a "go anywhere" system. Designed to be effective for the simplest to the most demanding deployment, there isn't a more comprehensive, scalable and straightforward system than Paratech's. Whether you choose the precision of the AcmeThread Strut, the automatic locking collar of the LockStroke Strut or the added length of the LongShore Strut, they are strong and versatile enough for nearly every collapse and stabilization scenario.

The entire system includes 5 sizes of AcmeThread Struts, 4 sizes of LockStroke Struts, 3 sizes of HydraFusion Struts, 4 sizes of AcmeThread/LockStroke Extensions, 5 sizes of LongShore Struts, 4 LongShore Extensions and over 20 interchangeable base plates designed to support a wide variety of contact points. All aluminum alloy components of the Rescue Support System are hard coat anodized to reduce electrical conductivity and increase strength and durability.

Truly a system that will not stop growing, Paratech's Rescue Support System can be used in excavation collapse (trenches, mines), vehicle stabilization, structural collapse and reinforcement, or wherever there is a need for quick, strong and safe vertical or horizontal shoring.

Structural Shoring

Earthquakes, construction collapse, cave-ins, floods and structural fire damage require a collapse rescue system designed for the purpose of extracting victims in a safe and timely manner.

Vehicle Stabilization

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios.

Trench Shoring

Paratech's pneumatic Rescue Struts allow for remote placement and easy locking as well as safe, remote removal. Used in combination with our Waler System, trench rescue has never been faster, easier or safer.

Special Applications

To be used in combination with Paratech's LongShore, AcmeThread and LockStroke Struts, a wide variety of bases and accessories are available to assist in numerous special application scenarios. These include, but in no way are limited to: elevator shaft access and victim retrieval, high angle applications, confined space work and trench rescue. Add-on kits include: Tripod, Bipod, Monopod and Elevator Support Unit Kits.

AcmeThread Strut

The Paratech AcmeThread Struts are comprised of a 2½" diameter Acme threaded aluminum movable solid shaft that extends out of a 3" diameter aluminum tube. The AcmeThread is a square thread that allows full surface contact of the shaft through the collar and the collar full surface contact on the tube to transfer load directly to ground. AcmeThread Struts can be extended manually or pneumatically with air, carbon dioxide or nitrogen.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

LockStroke Strut

The Paratech LockStroke Struts are comprised of a 2½" diameter grooved solid aluminum movable shaft that extends out of a 3" diameter aluminum tube. LockStroke Struts have a ball bearing filled collar that locks automatically when the shaft extends either manually or pneumatically with air, carbon dioxide or nitrogen.

'SET' strut into position, 'EXTEND' strut with air or manually and the strut 'LOCKS' automatically. It is as easy as...

LongShore Strut

The Paratech LongShore Struts are comprised of a 3" diameter threaded aluminum movable shaft that extends out of a 3½" diameter aluminum tube. The square thread allows full surface contact of the shaft through the collar and the collar full surface contact on the tube to transfer load directly to ground. LongShore Struts can be extended manually or pneumatically with air, carbon dioxide or nitrogen.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

HydraFusion Strut

The Paratech HydraFusion Struts (AcmeThread) are comprised of a 3" diameter threaded aluminum shaft that extends hydraulically out of a 3 1/2" diameter aluminum tube. The hydraulic lift capacity is 10 U.S. tons with a 2:1 safety factor. Once the strut is extended, the AcmeThread collar is spun down to the locked position and creates a 20,000 lbs. 4:1 safety factor for stabilization.

Place strut into position, 'EXTEND' threaded shaft into desired length, 'SPIN' collar to 'LOCK' the strut.

It is as easy as...

EXTEND & SPIN TO LOCK

Adjustments to the threaded shaft can be made in ANY increment up to the maximum length of the strut.

Absolute Flying Raker

Paratech fully mechanical Absolute Flying Raker Sets leave the wood behind. Stronger, faster and easier than wood, the Absolute Flying Raker in 8 ft (2,4 m) sets, allow rescue teams to build rakers around the rubble pile.

Use the Woodless Flying Raker kit upgrade to upgrade a Standard Flying Raker to an Absolute Woodless Flying Raker. Interoperational with all Paratech Rescue Support Systems, as always.

High Strength Structural Kit

The Paratech High Strength Structural Kit is designed to cope with the heaviest loads seen in USAR. The HSSK combines 3 heavy duty LongShore shoring struts, the strongest shores Paratech produces, and combines them into a single shoring configuration using a simple and easy to install hand tightened tri-brace. The tri-brace ties the shores together and provides rescuers 3X the load rating listed shoring capacity of the tabulated data on the LongShore strut at a given length. The HSSK can be used to shore the extremely heavy loads at length such as replacing damaged columns in a compromised structure.

Vehicle Stabilization Kits

Vehicle Stabilization Kit

Paratech Vehicle Stabilization Kits have the strength and flexibility to handle any size vehicle anytime, anywhere. This includes sub compact cars, buses, cement trucks and even train locomotives. Additionally, these components provide the extra value of being completely interchangeable with your other Paratech equipment for building collapse and trench rescue scenarios. They are strong, sturdy and reliable. Paratech systems are the easiest to use and the strongest VSKs on the market today.

VSK V2 Controller

Safely use compressed air to extend struts! This innovative controller is capable of extending the heaviest combination of struts and extensions with a simple on / off control. Its low 29 PSI / 2Bar pressure reduction and unique automatic vent relief feature, eliminates the fear of over pressurizing in the event of a load shift, ensuring a secure and steady strut extension. Ideal for safely chasing stabilization struts while performing a lift.

MultiForce Air Lifting Bags

Paratech's MULTIFORCE Air Lifting Bag takes lifting to a whole new level. Integrating the latest technology with a unique understanding of lifting, Paratech has designed the MULTIFORCE Air Lifting Bag to exceed expectations. Ease of use and speed of deployment make the MULTIFORCE Air Lifting Bag an obvious choice whether the goal is saving lives or lifting locomotives. Paratech's patented design ensures that the high lift of this system can get into the tightest places possible, while the innovative remote lifting base keeps personnel safely away from the load when positioning the MULTIFORCE Air Lifting Bag. A dual stage feature keeps the load steady as the bag inflates so load drift is minimized and safety relief valves are integrated into the bag itself making over-inflation completely impossible. No mechanical coupling between air chambers means a stronger and safer lift. The remote lifting base doubles as a storage device keeping the bag safe and making it extremely easy to store.

MaxiForce Air Lifting Bags

AIR LIFTING BAGS

MaxiForce® Has the Power To Lift or Shift Weights up to 106.7 tons

The MAXIFORCE® AIR LIFTING BAG is a thin, strong, molded envelope available in 14 different sizes. It is made from 3 layers of Neoprene covered Aramid fiber reinforcement and has the power to lift, move or shift weights up to 106.7 tons (96,8 metric tons) per bag. Control equipment and components play a critical role in successful lifting bag use and unlike other lifting bag systems, Paratech manufactures all of its major control components. This assures the quality of the lifting bag system from inflation to deflation.

What to Look for When Selecting a Lift Bag System

- 1. SAFETY:** MAXIFORCE® Air Lifting Bags are extremely tough, made of Neoprene, embedded with three (3) full layers of Aramid fiber reinforcement on each side, giving the bags tremendous strength at full inflation. Each Air Lifting Bag has been subjected to a stringent factory pressure test to assure maximum operator safety.
- 2. CAPACITY:** Does the height/weight capacity match the task? Non-emergency applications may only require one or two sizes. Emergency Service providers need a variety of lifting capacities.
- 3. SHAPE:** Match the shape of the bag to the contact area of the load to maximize your effectiveness. Use rectangular shaped bags against linear loads and when lifting on hills or inclines. Square bags are great for stacking on flat surfaces. Rescue crews should have both square and rectangular lifting bags.
- 4. THICKNESS:** The thinner the Lift Bag the better. The most notable feature of quality manufacturing is the ability to produce a thin, tough lifting bag. MAXIFORCE Air Lifting Bags range in thickness from 3/4 in(1,9 cm) to 1 in(2,5 cm).
- 5. MATERIAL:** Neoprene with Aramid reinforcement comprise most of the lift bag materials. These materials provide strength, durability, flexibility and chemical resistance. MAXIFORCE was the first Aramid reinforced high pressure Lift Bag.
- 6. SURFACE:** Small molded raised bumps provide an interlocking surface for stacking 2 lift bags. Once again MAXIFORCE was the first with an interlocking surface.
- 7. POSITIONING EYELETS:** At least 2 on all Lift Bags with a 12,9 ton rating or higher. A must for rescue work. Allows for vertical placement, safe retrieval and carrying.
- 8. MARKINGS:** Technical data is molded into the bag surface. Warnings are permanently labeled. The famous "X" marks the center of the load.
- 9. AIR INLET:** Brass with maximum pull strength. The inlet is threaded to receive a brass inflation nipple. Why brass? No corrosion. Easy to repair.
- 10. WORKS QUIETLY:** Completely silent in use. There are no engine sounds or loud mechanical noises when MAXIFORCE is used.

Man & Machine Kit

Paratech's man & machine kit covers areas of production, maintenance and rescue. The air lifting bags and control equipment (all contained in one convenient package) included in the kit are so versatile and easy to use that you will wonder what you did before you had them!

Man and Machine Kit, DIN
Weight 63.2 lbs./ 28,7 kg

Kit Contents:

- Full compliment of control equipment, hoses & fittings
- 2 small rectangular bags 6 x 12 in/15,2cm x 30,5cm
- 2 larger square bags
- 10 x 10in/25,4cm x 25,4cm
- 2 small square bags
- 6 x 6in/15,2cm x 15,2cm
- Heavy duty rolling storage case
- 4 plastic felling wedges

Dual Deadman 180PSI/12,4BAR Controllers

This controller will 'go anywhere'. It is compact and extremely portable. Rescue personnel can crawl into collapse areas without hindrance. There are no protruding joysticks or cumbersome enclosures. The push-button design must be depressed for inflation or deflation. Color coded gauges make it easy to read. Relief valves and open couplings are built in the controller for maximum safety.

Compact Design

- Integrated Gauge Light
- Easy Operation
- Safety Couplings
- Fully Enclosed Gauges

Weight: .46 lbs (208,6 g)

Air Hoses

A full 3/8 in / 9,5 mm inside diameter in a wide range of colors and lengths. Couplings and nipples are field replaceable using simple hand tools. Working pressure of 300 psi / 20,7 bar assures reliability. Hose stays flexible over the full operating temperature range of the lift bag. Closed couplings prevent air escape at disconnect (no blowing debris).

Rescue Air Cushions

Ideal Tool for High Lift Requirements of Non-Reinforced Broad Surfaces Found on Trucks, Vans & Light Aircraft.

Rescue Air Cushions are an ideal tool for high lift requirements of non-reinforced broad surfaces found on trucks, vans and light aircraft. Cushions are also used by collapse rescue teams to fill voids and regain support for Rescue Struts, wall braces and shoring. With a maximum lift height up to 40 inches (102 cm), Rescue Air Cushions are available in 4 sizes.

Paratech's Rescue Air Cushions are ready for a wide range of applications

Trailer Lift

Vehicle Lift

Rescue Air Cushions are available in 4 sizes for maximum versatility and a wide range of applications.

Typical Applications Include:

- Major vehicle accidents (cars, trucks, buses)
- Light aircraft recovery
- Filling voids created in trench collapse
- Small vehicle turnovers
- Downed or trapped animals
- Flotation device
- Industrial lifting applications

A soft footprint allows placement on soft and uneven terrain, with a contact area exceeding lifting height.

Constructed with a highly durable contact area, Rescue Air Cushions have neoprene coated exterior and interior reinforcement belts.

Rescue Air Cushions can be inflated using a variety of compressed air sources including industrial compressed air, compressed air storage cylinders, air brake systems and portable blowers.

Vehicle Lift

Trailer Lift

Safety And Operational Features:

- Pressure relief valves on cushions and control valve
- Interior reinforcing maintains flat lift surfaces for direction of lift force
- Quick connect couplings with locking ring
- Positioning handles
- Each cushion is factory tested at 1.3 times operating pressure
- Contact area diameter exceeds lifting height
- Operating pressure of 0-14.5 psi / 1.0 bar aramid reinforced

Advantages:

- Lifting heights from 17 in to 40 in / 43 cm to 102 cm
- Greater stability due to the size of the contact area
- Lighter loads have predictable lift results
- Full lift capacity over full lifting height
- Soft footprint allows placement on soft and uneven terrain
- User repairable for limited damage or punctures
- Four sizes to choose from

Ease of Operation:

Air Cushion inflation can be made from a variety of compressed air sources:

- Industrial compressed air
- Compressed air storage cylinders
- Air brake systems
- Portable blowers

Portable, hand held controller includes adjustable valves, gauges and pressure reliefs

Forcible Entry Tools

Forcible Entry Tools

Paratech offers a wide range of forcible entry tools. From the compact and lightweight personal entry tools to the all-purpose Hooligan tools to the PRT Kit, Paratech has every tool you need to break through any barrier.

TiTAN Crash Axe	2.5 lbs / 1,13 kg	15.7 in / 39,9 cm	Rescue/Police/Military

For more than 60 years Paratech has set the standard for high quality heavy-duty forcible entry tools. These tools are designed to pry, pound, puncture, twist and cut open or remove all types of barriers between emergency personnel and the life they are saving. From our popular full line of Hooligan Tools to our powerful Percussive Rescue Tool (PRT), to our compact & versatile Pry-Axe...Paratech has led the way in design and manufacturing of dependable and unstoppable forcible entry tools.

Hooligan Tool

Setting the standard of excellence for Halligan type tools, the heavy duty Paratech Hooligan tools have features such as a stress proof bar, lightweight aluminum handles with machine grooved hand grips and gently curved claws that maximize prying leverage.

Paratech also offers the SPF, a single piece forged Hooligan, a top choice by many.

Personal Entry Tools

Paratech offers 3 different types of personal forcible entry tools, the Pry-Axe, Biel Tool, and the TITAN Crash Axe. The Pry-Axe has an extendable claw to offer the powerful 'Slam & Ram' capability for quick and decisive entry in tight quarters. The claw can be removed and inserted into the keyway in the axe head for twisting leverage.

PRT Percussive Rescue Tool

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact, without deflection, making it safer and more effective than a sledge and wedge.

Hooligan Tool

The Hooligan Tool is one of the world's most popular forcible entry tools. These heavy-duty tools were designed to pound, puncture, pry, twist, and cut all types of barriers encountered by emergency service personnel. The head and claw are forged from high alloy steel, heat treated for maximum strength, then fitted to a 1" (2,5 cm) stress proof bar. The bar has machine grooved non-slip grips. The Hooligan Tool features a claw that is gently curved for maximum prying leverage. The claw opening is parallel and fits over locks, hasps and many door bars. It can also be used as a nail puller and a gas shut off during emergencies. The "Highway Hooligan Tool" features a metal cutting claw with a machine sharpened metal cutter that uses the can opener principle to cut heavy gauge metal and composites.

Recommended Users

- Fire Departments
- Law Enforcement Agencies
- Rescue Squads
- Hazmat Teams
- Plant/Refinery Maintenance Crews
- Military and Public Utilities

Standard Claw:

Parallel opening for gas valve shutoffs, locks and hasps. Machine sharpened claws. Recessed nail puller. Claw radius for prying leverage.

Metal Cutting Claw:

Combines the capability of prying and metal cutting. Machine sharpened metal cutter uses can opener principle to cut heavy gauge metal and composites.

The SPF Hooligan is a single piece forged (SPF) tool intended to exceed FDNY specifications for their primary hand held forcible entry tools. It is the very first redesigned, (features included) single piece Halligan type tool.

Features

- Single Piece, closed die
- Forging for absolute consistent lengths
- Recessed nail puller type claw, a thin curved profile
- Cable groove at the rear of the tool head
- Electroless nickel plating

Parallel opening for gas valve shut-offs, locks and hasps

Thinnest claw on the market designed for better wedging

Long, sharp, tapered and gently curved pike to break a lock or latch

Curved bill is long with a smooth incline to force windows and doors

Pry-Axe

Here is a tool that has withstood the test of time. For over 40 years the Pry-Axe has remained the best selling tool in our line. The Pry-Axe is being used by fire departments, police departments and rescue squads worldwide.

The Pry-Axe is a lightweight, multi-purpose, 'Slam & Ram' tool designed to pry, enlarge openings, cut sheet metal and twist off locks and latches. This efficient tool lets every firefighter force entry, rescue and ventilate without waiting for help. The Pry-Axe is small enough to carry and rugged enough for most jobs.

The Pry-Axe head and claw assemblies are separate sections forged from high alloy steel and heat treated for maximum strength. A molded rubber sleeve over the handle provides a non-slip grip. The Pry-Axe is electroless nickel plated for good looks and easy maintenance.

PRT Rescue Kit

Part No.	Description	Length:	in	cm	Net Weight:	lb	kg
22-000625	PRT Rescue Kit	31.5	80,0		29,0	13,2	

The PRT Rescue Kit includes a variety of interchangeable tool bits to penetrate most barriers.

'SLAM AND RAM'

Action of the PRT directs all of its force directly at the point of impact

The PRT is a powerful hand held rescue tool that can be put to work with a minimal amount of training. Primarily designed for fast, forcible entry, one person can quickly pry open locks and doors in seconds and easily break through brick and concrete block walls within a few minutes.

The 'Slam & Ram' action of the PRT directs all of its force directly at the point of impact - without deflection, making it safer and more effective than a sledge and wedge.

This heavy duty rescue tool is easily stored and transported, so it can always be... the first tool to the rescue.

Powered Impact

From Breaking Concrete, to Cutting the Remains of a Melted Tanker Shell Apart, it Delivers the Punch.

PAKHAMMER

At only 11.3 lb / 5,1 kg and at 1000-1100 high impact blows per minute this PIT dramatically increases the range of rescue work for initial responding units

PAKHAMMER SC

It is the ideal crash rescue tool weighing 19.8 lb / 8,9 kg and exceeds current U.S. Air Force requirements for handheld pneumatic aircraft skin penetrator

Made from S7 tool steel and heat treated for long life, all PIT kits come equipped with a wide variety of standard and specialized tool bits.

Powered Impact Tools

Paratech's Powered Impact Tools (PIT) are designed for forcible entry during fire fighting and rescue operations. They are used for cutting metal and composites, breaking masonry walls, penetrating concrete floors, forcible entry and digging during tunneling operations. Paratech's PITs consume air only on the power stroke. This unique, patented design provides a pneumatic impact and penetrating device with an adjustable power output and very low air consumption.

The combined features of light weight, very low air consumption and a wide range of power settings make Paratech's Pakhammer extremely effective for rescue and fire fighting operations. Rescue workers may find themselves temporarily blocked by a masonry wall or faced with the need to penetrate a concrete floor. Building collapse often requires power assisted digging for access to victims.

CRASH RESCUE FROM AIRCRAFT:
Cut skins, spars, canopies.

CRASH FIRE FIGHTING:
Piercing applicator for dispensing extinguishing agents.

EXTRICATION:
From automobiles, trucks, transportation accidents.

DISASTER RESCUE:
Earthquake, collapse.

PNEUMATIC IMPACT PENETRATOR:
Use in rescue or industry.

RESCUE/FORCIBLE ENTRY:
Break doors, locks, padlocks, hasps.

DAMAGE CONTROL:
Access to compartments through watertight doors, heavy sheet metal.

BREAKS AND PUNCHES HOLES:
Concrete, asphalt.

Conventional pneumatic, hydraulic or electric power tools always require a hook-up to a bulky remote power source. Only Paratech's Pakhammer is designed for situations where the power source must be as portable as the tool. Designed to operate intermittently for up to 15 minutes on a single SCBA cylinder, there is nothing to stop a Paratech Pakhammer from being where the action is.

The Pakhammer is designed to operate from any compressed air source at a pressure range of:
40 to 200 psi / 2.7 to 13,7 bar.

A 1000–1100 high impact blows per minute, 11 pound impact tool that dramatically increases the range of forcible entry and rescue work initial responding units can handle without calling up heavy equipment. The Pakhammer is the only pneumatic impact tool of its size that is designed to operate from portable air cylinders. It is an ideal tool for bus and train rescue, high rise work, collapse rescue or any situation that requires a powerful impact tool that operates from a limited air supply.

This multipurpose kit is designed to handle numerous functions in ARFF. Includes a cutting bit designed to cut aircraft windshields and canopies, a cutting bit to cut sheet metal, a plug driver bit and neoprene plugs for leak sealing, piercing nozzle that can penetrate the GLARE composite skin as well as, CFRP (Carbon Fiber Reinforced Plastic). The 14" Piercing nozzle can flow water or chemical firefighting agents like foam etc. to help put out fires. This Grab and Go kit also includes the Paratech Pakhammer, designed to use with a limited air supply, uses less air and hits harder than any other tool of its kind and can go much longer before an air change is needed. Other pieces of equipment in this versatile kit are an adjustable regulator that can operate the tool at a range of 40 psi to 200 psi.

The Pakhammer SC (Self Contained) is designed to exceed current U.S. Air Force requirements for an aircraft skin penetrator. It is an ideal crash rescue tool. Carrying its own limited air supply, a firefighter can rapidly insert several penetrator/applicator nozzles depending on the location and spread of fire or fuel. These penetrator/ applicator nozzles will flow water, AFFF solutions and Halon. When the self contained air supply is exhausted the air supply assembly can be quickly detached in favor of another air source. The firefighter now has the full benefit of a standard Pakhammer to continue rescue operations.

Damage Control Systems

Damage Control System (DCS)

Direct Compression

I-Type, can be used vertically or horizontally and is the simplest and strongest as it is parallel to the load axis (see table).

Cross-Axial

H-Type, can be used vertically or horizontally and takes moderate pressure (see table) as the pressure acts perpendicular to the load axis.

Triangulation

K-Type, can be used vertically or horizontally and takes full pressure (see table) as the pressure acts parallel to the load axis.

The most important factor you get with Paratech's DCS is time! With incoming water comes increasing depth and with that, higher water pressure...one of the most unforgiving vicious cycles has begun. To break the cycle you need time...time to build shoring that can slow the incoming water enough for the pumps to keep up... The Paratech Damage Control System will provide that break.

The **Paratech Damage Control System (DCS)** brings maritime damage control shoring into the 21st century. Speed, strength, flexibility and capability are the hallmarks of Paratech's DCS. Everything about the system has been engineered to simplify the difficult task Damage Control Teams have to face in the harsh and often dangerous working environments they have to perform in. With the Paratech DCS you will achieve setup speeds never seen with any wood-based system. A standard K brace can be set and fitted within one minute by an experienced team. The system is very logical and user-friendly for unexperienced crew members as well. All components of Paratech's DCS are machined from aircraft grade aluminum for superior strength and hard-coat anodized for maximum salt-spray protection. Designed to last and perform, the DCS makes damage control shoring faster, safer and easier than ever before.

Shoring

Placing support against, beneath or above the damaged areas and preventing additional sagging, bulging and metal fatigue.

Ordering Terms, Conditions & Warranty

ORDERING WITH CREDIT CARD USING VISA, MASTER CARD AND AMERICAN EXPRESS ONLY:

We accept orders via mail, e-mail and fax. When ordering, be sure to include the item number and exact quantity of each item.

ORDERING BY PURCHASE ORDER: Orders from municipalities and fire protection districts will be re-directed to the appropriate Paratech Dealer. Terms are net 30 days with approved credit.

ORDER CONFIRMATION: Order Confirmations are sent via e-mail or fax. The confirmation is our understanding of your order requirements. Discrepancies between your order and the confirmation should be reported at once.

PRICING: All orders will ship with current pricing as indicated on your confirmation.

MINIMUM ORDER REQUIREMENT: Orders under 50.00 will assess an additional 25.00 fee for processing and handling.

FREIGHT (DOMESTIC TRUCK SHIPMENTS): F.O.B. our plant, Frankfort, IL, U.S.A. Special shipping instructions must be made at time of order. Charges will not appear on Order Confirmation.

FREIGHT (UPS or FedEx): Handling and Freight Charges will be added to invoice. Charges will not appear on order confirmation.

FREIGHT (INTERNATIONAL SHIPPING): EXW Paratech Inc. (815-469-3911) or Paratech Europe (+45-66-11-24-22). Contact Customer Service for special shipping instructions. Charges will not appear on Order Confirmation.

BACK ORDER POLICY: Due to unexpected demand, we may be temporarily out of stock on certain items. If you place an order for any merchandise that is currently not available, we will contact you regarding your order via phone or email. You will have the option of placing the order on hold or obtaining the "in-stock" items and receiving a 2nd shipment with the back-ordered items at a later date. Handling and freight will apply to the 2nd shipment.

RETURNING MERCHANDISE: Customer Service must authorize all returned merchandise in advance. Please contact the company for a Returned Goods Authorization Number (RGA#). Warranty replacements/returns for credit must go through the selling dealer. A minimum 15% restocking charge may apply.

WARRANTIES

Paratech Product Warranties:

- Rescue Support Systems / 5 years
- MAXIFORCE® Air Lifting Bags / 3 years
- MULTIFORCE® Air Lifting Bags / 3 years
- Powered Impact Tools / 1 year
- Rescue Air Cushions / 1 year

Our products are designed to be used in situations that often result in the saving of lives, the prevention or reduction of bodily injuries, the preservation of our environment, and the protection of property. Unfortunately, many of these incidents go unnoticed and are quickly forgotten.

Paratech would appreciate you taking a few moments to share these incidents with us by completing the Rescue Award application and filling out our online application at <https://www.paratech.us/submit-rescue-award>. We will send each active participant of your rescue our distinctive Rescue Award emblem and certificate. A separate award will be awarded in the name of the individual's unit.

The Rescue Awards we offer correspond to our main product groups:

- RSS - Rescue Support Systems
- MAXIFORCE® & MultiForce® - Air Lifting Bags
- RAC - Rescue Air Cushions
- PIT - Powered Impact Tools
- FET - Forcible Entry Tools
- DCS - Damage Control System

There is no limit to the amount of awards you may apply for.

Paratech hopes you will apply after each and every incident involving the successful use of a Paratech product. Each award application we receive is shared with our employees and will be posted on our website for the world to see your accomplishments using Paratech equipment. The awards you receive are a tremendous source of pride for all of us here at Paratech.
